

Our Effort to Look After Everyone

As dental professionals, we are committed to ensure the health and safety of everyone at all times.

We continue to maintain strict and effective infection control protocols, good hand hygiene, thorough disinfection of all surfaces within the clinic and the use of full personal protective equipment (masks, gloves, gowns & face shields).

The use of a high-vacuum suction system in combination with an assistant allows optimal suction and effectively reduce aerosol formation up to 90%.

Additional efforts to prevent the spread of Covid-19

- A strong **extra-oral suction machine** will be used to reduce droplets & aerosols.
- **1 min. mouth rinse** will be provided before the procedure to reduce the bacterial load in the aerosol particles & kill viruses
- Appointments will be spaced out to allow time for **additional disinfection measures** & prevent cross-infection.

Please be patient with us as we overcome this together.
